About This Game

this game is for you!

Meet **CMD 2048** - a modern model of minimalism, refuting any need for highly polygonal models and combining the fascinating mechanics of a puzzle that has become so popular made with the creative design of the end of the last century. This game will steal you from the paws of everyday routine, leaving behind purely positive emotions, and it will also increase the level of your intelligence (+200 IQ).

HOW TO PLAY

Use your arrow or WASD keys to move the tiles. When two tiles with the same number touch, they merge into one! 8 .. 16 ... 1024 .. 2048. If you have 2048 on the board you have won, but you lose once the board is full and you cannot make a move.

KEY FEATURES

- The game runs directly on the Command line. Get your portion of enjoyment even on the most primitive computer!
- Is there a limit to perfection? Of course not! Watch the table of records and compete in the flexibility of your own thinking even after reaching the desired mark in 2048!
- Made a mistake? No problem! The game will allow you to take a step back in case of a desperate situation.
- Several backgrounds to choose from, choose the one you like best!
- Nice graphics which is pleasant to the eyes, performed in minimalist style.

PS. This is the first project of my friend, who recently returned from the Russian Army.
