Have 75 hours in this game, don't listen to those divas saying that the game is trash or glitchy or over grinding. They've fixed the TOT and towers in general, they fixed the grinding, they added 60 FPS option for PC players, lowered the number of fatalities for heads (done them all in around 25 hours in playing the game, roughly around 1 hour per character which ISN'T bad at all).

Graphics are GREAT for a Mortal Kombat 2.5D game, the gameplay itself makes the game 10x better and it's worth buying if you like the series.

What else do you want? Time Krystals are EASY to make, have 3.5k already and spent 500 and most importantly: skins are 100% Optional and that's the only thing you can buy.. So boring. This game is ONLY hidden object puzzles. NO PLOT, no real scenery or progression of story except little video clips between puzzles. No voices, which in itself is not a bad thing, but in this game it just adds to the misery. Not my type of game.. Why you game What Ugrade up ST and DF and HP? Where Update not like Im dead Where Slime :(This game is a port from an Ipad game, which explains many things. In some ways the graphics are a step back from the previous Spiderweb games (and I have most of them) because of the Ipad properties like no enhancements when mousing over choices and poor sprites and no zoom and a minimap difficult to read. If you don't mind twenty-year old graphics and like games with a good storyline and very much text, then you will probably like this game.. The predator..... all that needs to be said to convince me. Really enjoyed Rise to Ruins until the implementation of trash, which broke the game due to the immense increase in micromanagement that hasn't been addressed properly. Now you cannot harvest a section of wood, food or even rocks without microing the EXACT amount you need to build a new structure since the new INSANE rate of decay ensures that even ROCKS disintegrate into 'crocky trash' in a day or two. WTF is 'crocky trash' anyway!?!

I do see the sense in having raw food decay in a day or two, but rocks and wood? Even the increased deterioration of food leaves an abundance of microing which this once great game does NOT need. It's adding nothing to the overall playability of Rise to Ruins, and is adding plain frustration and unnecessary microing.

Please rework trash, or remove it, or preferably make it optional. You have golems, undead and ghosts. Why trash? Just doesn't make any sense.. I play all my 6DOF games with a 6DOF controller, including the original Forsaken on a CD. I'll recommend this remastered version if 6DOF controller (joystick/3Dmouse) support is added back into the game.. Doom might be timeless but this wad pack is not. The front end and methodology is super dated from a time when it was hard to get internet access, and the maps themselves have many now-dated techniques. Also, hiding keys in secrets, which I hate. Outside of some decent maps from Tim Willits and Dr Sleep there's not much here.. THE Hitman game to rule them all.

Unintuitive gamepad controls which make pulling off moves more difficult than it has to be.

Also, the developers have been MIA, don't really seem to be listening to player feedback and yet they found the time and resources to release DLC.. Charming puzzle-platformer. Minimalist mechanics combine to give some surprisingly varied gameplay. Speed runs will teach you a lot about economy of motion.. Classic RTS must have for any RTS fan!. It is a sourcebook on PDF for the Shadowrun PnP game version 5. You find it in the folder called Shadowrun 5th Edition in the Extra folder. The Extra folder will be in the Shadowrun Chronicles game folder. I was able to copy the folder to my documents folder and open the pdf. It has 489 pages full of words, tables and pictures. Looked like any other Source book from the various publishers of the Shadowrun universe. This is the latest from Catalyst games publisher. This is the Rule book for Shadowrun pen and paper game version 5. There is also a separate character sheet pdf and Errata pdf. You also need a large number of 6 sided dice to play.

Get it if you are interested in being a GM for Shadowrun PnP game or going to play Shadowrun on paper. Better if you buy on deep sale.
